

Working Student Position

TUM Venture Lab Additive Manufacturing

The TUM Venture Labs are a joint initiative of UnternehmerTUM and TUM. We combine a network of domain-specific incubators acting as a springboard for Entrepreneurship in deep tech and life sciences. Our mission is to help start-ups with strategic advice, infrastructure, and an active network of academic and industry experts to scale from first idea to investor readiness.

As [TUM Venture Labs Additive Manufacturing](#), we are working closely together with the Chair of Materials Engineering of Additive Manufacturing (MAT), whose scientific core activities focus on the analysis of process-structure-property relationships in the additive and advanced manufacturing of high-performance alloys and the use of these findings to develop new materials and processing methods.

Join us as an Operations Support to empower the next generation of AM experts and entrepreneurs! We are looking for enthusiastic team members throughout this journey – and need your support to realize this vision! We are happy to welcome a:

Working Student as Operations Support (f/m/d) for the TUM Venture Lab Additive Manufacturing in Garching

Your mission:

- **Operations Support:** Engage in the day-to-day operations and enhance the functionality of our internal processes;
- **Start-Up Pipeline Management:** Manage our start-up pipeline, ensuring a seamless transition and successful engagement for new ventures.
- **Marketing & Events:** Participate in the creation, development, and execution of marketing strategies. Organize and coordinate diverse event formats such as keynotes and networking events in and around Munich, increasing our visibility and impact.

Your profile

- Bachelor's degree or Master's degree student at the TUM, preferably Management and Technology, or related degree
- Motivation and openness to get to know the emerging startup ecosystem and to work with an innovative team in Garching
- You have a strong entrepreneurial mindset, hands-on mentality, you like to take initiatives and you suggest creative ideas and make them happen
- You are well-organized, reliable and you are able to work in a team
- You have strong written and verbal communication skills both in English and in German

What we offer

- High level of responsibility in a start-up-like working mode, flat hierarchies, and high degrees of freedom.
- An innovative environment with real impact at the forefront of technology directly embedded in Europe's #1 leading Start-up Hub!
- Highly dynamic and well-connected working environment with inspiring talents, leaders, experts, researchers, and accomplished entrepreneurs.

As an equal opportunity and affirmative action employer, we explicitly encourage applications from women and all others who would bring additional diversity dimensions to us. Preference will be given to disabled candidates with the same qualifications.

If you want to help young entrepreneurs to solve the great challenges of our time through AM and become part of our unique network of exceptional research institutions, UnternehmerTUM, and leading industry partners, then reach out to us!

Apply by uploading your updated CV and a short motivation letter (max 500 words) to the [TUM Venture Labs Portal](#)
