

# GlobalDrive: Ecosystem of Logistics

## International Thesis Project (MA/SA)

Join an exciting **thesis project** in cooperation with an **international truck OEM**! Work on cutting-edge logistics topics, collaborate with an international team, and **travel to Sweden** for on-site research.

### What's in it for you:

- Explore the future ecosystem of logistics in cooperation with **MAN & TRATON**
- Funded research stay in Sweden (2 weeks) and collaboration in a team with Swedish students from KTH
- **Semester** or **Master's thesis** supervised by the Institute of Automotive Technology
- Topic defined jointly based on your interests and experience, covering, e.g., the effects of electrification and automation, software integration, or evolving logistics business models

### We're looking for you if you are ...

- a Master's student in **Engineering, Economics, IT** (or related)
- strongly interested in technical innovation, with an understanding of industrial ecosystems
- proficient in English
- interested in working in interdisciplinary and international teams

### Sounds good?

**Apply now** by sending (1) your CV, (2) your current transcript of records, and (3) a short statement (max. one page) entitled "My vision of logistics in ten years" including an indication of your preferred thesis topic, by **28<sup>th</sup> August** to [spirit-e.ftm@ed.tum.de](mailto:spirit-e.ftm@ed.tum.de). Interviews will be held online on 1<sup>st</sup> and 2<sup>nd</sup> September.
