

Global Drive: Future of Logistics

International Thesis Project (MA/SA)

Join an exciting **thesis project** in cooperation with **international truck OEM!** Work on cutting-edge logistics topics, collaborate with an international team, and **travel to Sweden** for on-site research.

What's in it for you:

- Explore the future of logistics in cooperation with **MAN & TRATON**
- Funded research stay in Sweden (2 weeks) and collaboration in a team with Swedish students
- **Semester** or **Master's thesis** supervised by the Institute of Automotive Technology
- Topic defined jointly based on your interests and experience, covering, e.g., the effects of electrification and automation, software integration, or evolving logistics business models

We're looking for you if you are ...

- a Master's student in **Engineering, Economics, IT** (or related)
- strongly interested in technical innovation, with an understanding of industrial product life cycles
- proficient in English
- interested to work in interdisciplinary and international teams

Sounds good?

Apply now by sending (1) your CV, (2) your current transcript of records, and (3) a short statement (max. 1 page) entitled "My vision of logistics in 10 years" **until 7th September** to spirit-e.ftm@ed.tum.de. Interviews will be held online on 15th September.
