

Where is ~~Waldo~~ EDGAR?

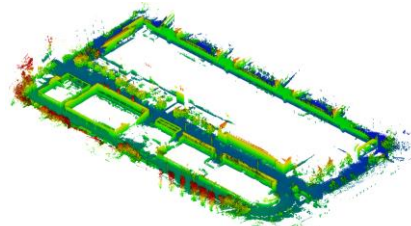

You were able to find EDGAR and you are generally good at localization?

Then join the EDGAR team and write a **student thesis** in the field of localization of autonomous vehicles at the FTM!

You will work in an agile team with other students and in close collaboration with PhDs to solve problems in autonomous driving. You will have the opportunity to work hands-on on a state-of-the-art research vehicle, test your algorithms in the real world and contribute to the open-source landscape!

You are a fan of point clouds?

We are looking for students with an interest in **state estimation**, **RaDAR**-, **LiDAR**-, **camera-localization**, and much more.
